WE SUPPLY RELIABLE AND HIGH QUALITY WEIGHTS WORLDWIDE.

OUR PRODUCTS

Our weights range from milligrams to tons, all made under one roof. In addition to meeting everyday customer needs, HÄFNER sets great store in accommodating special wishes:

- + very small weights (down to 0.1 mg)
- + very large weights (up to 5000 kg)
- + Special forms such as load weights or bent-wire milligram weights
- + Accessories such as bell jars or forks
- + Special markings (e.g. barcodes and signs)
- + Boxes and cases according to customer demands
- + the new Si-kg mass standard
- + SimplyCal software (Balance Calibration)

HÄFNER - SPECIALIST FOR WEIGHTS AND WEIGHT SETS

EVER SINCE OUR COMPANY WAS FOUNDED IN 1933 IN OBERROT, A SMALL TOWN IN THE SWABIAN REGION OF GERMANY, WE HAVE BEEN MANUFACTURING WEIGHTS FOR A WIDE RANGE OF APPLICATIONS.

These weights range from milligrams to tons, all made under one roof. We are certified to EN ISO 9001:2015 and are known worldwide for our high reliability and quality.

With the advent of electronic weighing devices, the role of weights has changed. Originally used as weighing instruments in conjunction with scales, weights are now used as adjusting, calibration and test equipment for balances and force measuring devices. The demands on weights are constantly rising with the continuously increasing accuracy and resolution of electronic load cells.

We recognised this trend early on and responded to the challenge. Rationalisation and the utilisation of advanced technology form the basis for our leading position in modern weights manufacturing.

Furthermore, our calibration laboratory MASSCAL is accredited by the German Accreditation Body (DAkkS) and is a member of the German Calibration Service (DKD).

WHEN PERFORMANCE COUNTS

OUR QUALITY EXPECTATIONS

Over many decades and in the history of our family-owned business, perfection and the name HÄFNER have become inseparable.

Worldwide trust and recognition by national metrology institutes (NMIs) such as PTB, NPL etc., as well as accredited calibration laboratories, state offices for verification, scale and balance manufacturers, companies for repair and maintenance, distributors for laboratory equipment, companies in all industrial sectors and not least our competitors, testify to our exceptional performance and our success.

Customer wishes and requirements for perfect weights can only be fulfilled by an ongoing development process that creates the necessary conditions and means for improvement.

We strive to repay your trust in HÄFNER with our quality and performance. **Challenge us!**

QUALITY MANAGEMENT

HÄFNER has had a quality management system in place for over 20 years and is certified according to DIN EN ISO 9001:2015 (Reg. No. 059 993 QM15).

We are always up-to-date in science and technology thanks to our active participation in the technical committee of the German Calibration Service (DKD) and close cooperation with the German National Metrology Institute PTB.

OUR WEIGHTS ARE SO GOOD THAT OUR STAFF ARE PROUD OF EVERY ONE OF THEM.

PERFECT WEIGHTS

At HÄFNER every blank is formed from special materials. Advanced casting technology and extremely precise CNC machine tools are key parts of the production process.

Consistently high precision of all HÄFNER blanks is ensured by our exceptional expertise and advanced surface processing technology. What happens afterward is pure craftsmanship.

With considerable experience and sensitivity, our employees machine each weight to the specified value. Every step in the process is checked using extremely accurate scales with calibrated standard weights, and ambient conditions are monitored continuously.

HÄFNER marks the weights using special corrosion-proof laser technology to ensure that the weights retain their values. This allows weight standards in classes E2, E1 and E0 to be identified reliably without confusion.

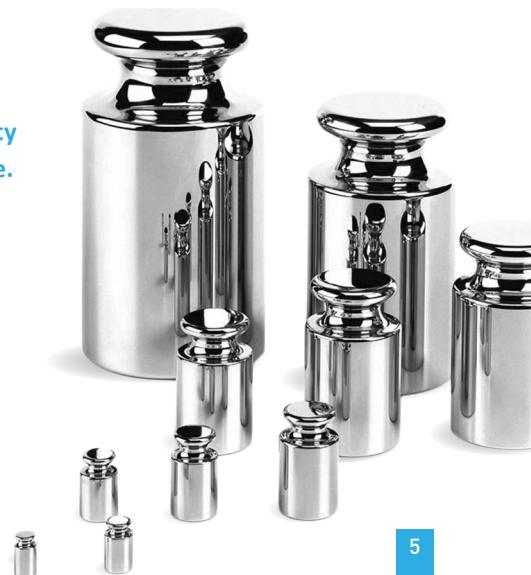

Another key factor for manufacturing perfect weights is our special HE210 steel, which was developed to meet the requirements of class

E0. As a result, for many years national metrology institutes have been able to rely on their primary weight standards (class E0) and secondary mass standards (class E1) from HÄFNER.

Before delivery, each HÄFNER weight is again cleaned and checked, and if requested by the customer a calibration certificate (e.g. a DAkkS calibration certificate) is prepared to document quality and traceability to the national kilogram prototype.

HÄFNER perfection is only possible with staff who are experts at their trade.

Service and reliability at an attractive price.

MORE RELIABILITY AND SAFETY WHEN WEIGHING

An important part of your business success is the assurance of the quality of your products.

A recognised quality management system is therefore an absolute prerequisite in the world of measuring and weighing.

QM standards and QM guidelines - such as ISO 9001, VDA 6.1, ISO 10012, IATF 16949, ISO 17025 and the GLP/GMP regulations - require that reproducible measurement results be ensured by means of reliable, operational measuring and test equipment, including balances and standards (calibration and test weights).

Documented inspection equipment monitoring is therefore an important obligation and relieves you of the burden of product liability and due diligence as necessary evidence.

HÄFNER, as one of the world's leading manufacturers of weights, offers you the following services for test sequence and test equipment planning expertise and experience;

- ✓ Know-how and experience,
- ✓ Advice and competence,
- ✓ highest precision and quality,
- ✓ Flexibility and special requests,
- ✓ Service and reliability

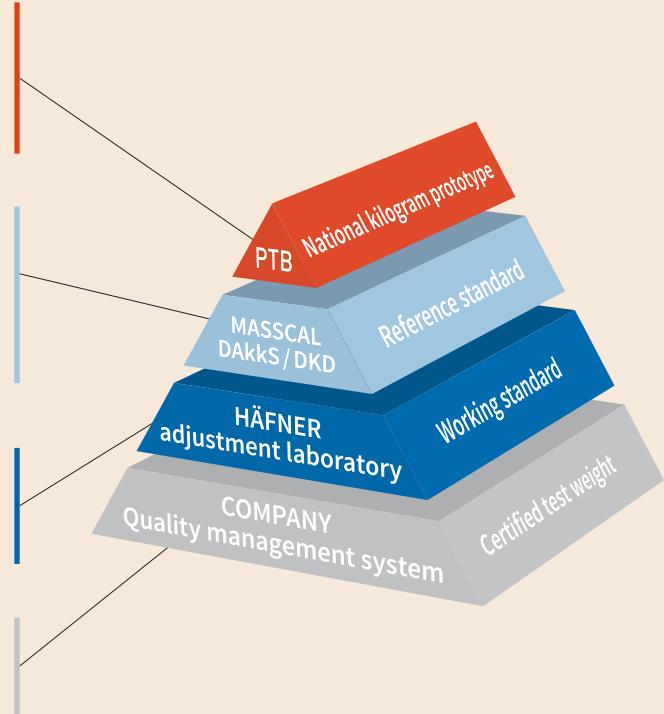

TRACEABILITY TO THE NATIONAL WEIGHT STANDARD

The Physikalisch Technische Bundesanstalt (PTB) is the metrological state institute in Germany and provides access to the physical SI mass standards. It has the mandate and the task to keep available and to forward the national weight standards (e.g. for mass).

Our calibration laboratory MASSCAL is accredited as a calibration laboratory by the DAkkS (Reg. No. D-K-15192-01-00). The internationally valid DAkkS calibration certificates meet the requirements for test equipment monitoring and serve as evidence for metrological traceability to the national weight standard.

HÄFNER works with a quality management system and is certified to EN ISO 9001:2015 by DQS (Reg. No.059 993 QM15). Working and utility standards are traceable to national standards through accredited calibrations.

In the world of measuring and weighing, a certified quality management system is essential as a basis for ensuring the quality of your products.

MASSCAL CALIBRATION AND ADJUSTMENT LABORATORY

HÄFNER has the spacious adjustment and calibration laboratory "MASSCAL", which meets the highest metrological demands. With high investments, we keep our measuring equipment at the cutting edge of technology.

Our calibration laboratory "MASSCAL" (D-K-15192-01-00) complies with the international standard DIN EN ISO/IEC 17025:2018 and is accredited by the Deutsche Akkreditierungsstelle GmbH (DAkkS) up to and including the highest tolerance class E1 according to OIML R111-1 : 2004. This gives our calibration certificates international recognition.

The DAkkS-accredited calibration certificate documents the metrological traceability to national standards for the representation of units in accordance with the International System of Units (SI).

A balance has a maximum rated capacity of 1,000 g and a scale division d of 10 mg. The user manual specifies an external calibration weight with a nominal value of 1 kg. According to step A.1, the number of scale intervals that the balance can measure is 100,000.

According to step A.2, the required tolerance with a nominal weight of 1 kg is between 5 and 10 mg. Tolerance class F1 meets this requirement (± 5 mg).

The following test loads are determined in step B.2: 250 g, 500 g, 750 g and 1 kg. According to OIML R111 the following four test weights in the class F1 are determined: 50 g, 200 g, 500 g and 1 kg.

$$\text{Number of scale intervals } n = \frac{\text{Max. load capacity}}{\text{Scale interval } d}$$

Accuracy of the balance (scale)	Resolution of the balance: quotient of max. range / readability	Required tolerance class of the weights
IV Ordinary accuracy scale	$\leq 1.000 d$	Class M3
III Medium accuracy scale	$\leq 10.000 d$	Class M1
II Precision balance	$\leq 50.000 d$	Class F2
I Analytical balance	$\leq 100.000 d$	Class F1
	$> 100.000 d$	Class E2

A.

DETERMINE THE RIGHT TOLERANCE CLASS FOR THE TEST WEIGHTS

- Determine the number of intervals n by dividing the maximum weight by the scale division d (smallest reading digit) of the weighing range (measuring range).

$$\text{Number of steps } n = \frac{\text{Max. load capacity}}{\text{Scale interval } d}$$

- Determine the tolerance class of the test weights from the required tolerance.

Weighing range (measuring range)	Tolerance of the test weight, depending on the safety requirement
$n = 100.000$	0,5 d and 1 d
$100.000 < n < 500.000$	Between 1 d and 2 d
$n > 500.000$	less than 3 d

For this, choose a nominal value equal or close to the maximum value of the weighing range (measuring range). This nominal value should always be greater than 80% of the maximum rated capacity.

You can round up or down by a small amount. In case of doubt you should always choose the next smaller tolerance.

B.

DETERMINE THE REQUIRED NOMINAL VALUES (WEIGHTS)

- Cursory testing

You can make most of the test measurements for the weighing range with just one test weight (nominal value). The nominal value of the external calibration weight is often used for this purpose (consult the user guide or operating software of your balance). This nominal value should always be greater than 80% of the maximum rated capacity.

- Complete testing

Use this method to check the weighing range (measuring range) against the maximum potential requirements. The following four test loads are required: 25%, 50%, 75% and 100% (or at least 80%) of the maximum rated capacity.

The test weight for 100% (or at least 80%) of the maximum rated capacity should consist of just one weight, rather than a combination of several test weights.

If you have any questions, we would be pleased to advise you on choosing suitable test weights for your measuring or test task. We support you in the specification of test plans and give you recommendations about appropriate documentation and interpretation of your test results.

ADVICES FOR RELIABLE MEASURING RESULTS

Reliable, constant weighing and measuring results require compliance with the following rules:

1. Balances and measuring systems must be monitored and maintained competently. The metrological properties must be familiar.
2. Balances and measuring systems must be adjusted regularly – depending on frequency of use – with adjustment and test weights and must also be calibrated according to an acknowledged test method.
3. The adjustment and test weights you use must be traceable back to national normal weights, this is, they must be calibrated regularly.
4. The test and calibration results must be documented together with their uncertainty of measurement (e.g. by a protocol of the test for scales and a DAkkS calibration certificate for weights.)
5. Test and calibration results must be evaluated. The test and calibration periods for scales and weights must be determined and be controlled with a test plan.
6. Test protocols or calibration certificates must be kept for a sufficient long time.

Increase your competitiveness. The confidence of your customers is important.

THE NEW KILOGRAM

MADE BY NATURAL SILICON SPHERES

The redefinition of the SI unit kilogram is closely linked to the necessity of an appropriate dissemination of this unit by means of mass standards.

Due to its material properties, robustness and easy handling, silicon is very well suited in comparison to other considered materials. At PTB, a procedure for the manufacture, handling, storage, transportation, cleaning and metrological assessment was developed and tested.

PTB together with two industrial cooperation partners are participating in this "Si-kg" project with the aim to make silicon spheres and procedures available for a broader use.

SPECIAL TRANSPORT CONTAINER

for 1 kg silicon sphere, consisting of 2 parts: base part made of special aluminium with special plastic for centering, upper part made of special aluminium with a polycarbonate tube; special center screw made of plastic

TRANSPORT CASE

for housing the transport container of 1 kg silicon sphere, special aluminium frame case with hardfoam inserts, with hinged handle on the top and with lockable closure

BELL JAR

with base for 1 kg silicon sphere, consisting of special aluminum base, special glass bell (plane grinded) and sphere seat (made of PEEK), for storage in the laboratory

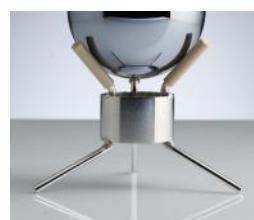

SPECIAL TRANSPORT CONTAINER

inspection plate made of anodized special aluminum, with polished sphere holder made of PEEK and with bell jar for 1 kg silicon sphere, with built-in rotatable plate for surface inspection

SPECIAL LED TORCH

for inspection of silicon spheres, special air bulb with built-in air filter, for safe cleaning of dust particles

SPHERE HOLDER

tripod as cleaning aid, made of special stainless steel, electrolytically polished, with polished PEEK caps

ACCESSORIES FOR SILICON SPHERES

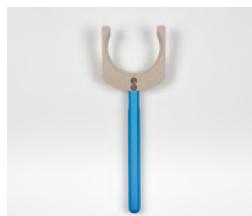

HI-TECH PADS D 60 MM

for silicon spheres, used as underlay in various sphere accessories, knitted cloth, ultrasonic, poured and washed, package (10 pieces)

HI-TECH PADS D 100 MM

for silicon spheres, used for cleaning and as underlay in various sphere accessories, knitted cloth, laser-cut, poured and washed, package (10 pieces)

SPECIAL FORK

for handling 1 kg silicon sphere, handle made of anodized aluminum, support plate made of polished PEEK

SPECIAL TONG

for handling 1 kg silicon sphere, with spherical, self-centering jaws, which are covered with special microfiber caps, with smooth or bow handles

HI-TECH CLEANING WIPES

for silicon spheres, 40 x 40 cm, knitted cloth, laser-cut, poured and washed, package (10 pieces)

SPECIAL NITRILE GLOVES

for use in the cleaning of silicon sphere, 100% nitrile, powder- and silicone free, recommended by PTB, sizes S, M, L and XL available, package (100 pieces)

SPECIAL MICROFIBER GLOVES

high-purity model, in pairs, sizes S and L available

CLEANING CONCENTRATE

deconex, ph neutral, salt-free cleaning concentrate, used for the very gentle cleaning of silicon spheres, 2 % dosage in distilled water is recommended, available container sizes: 1 l and 10 l

E0

Primary and Secondary Mass Standards of Class E0

As a national mass standard and /or for representing the national mass scale up to 50 kg.
For the calibration of mass standards of the classes E1.

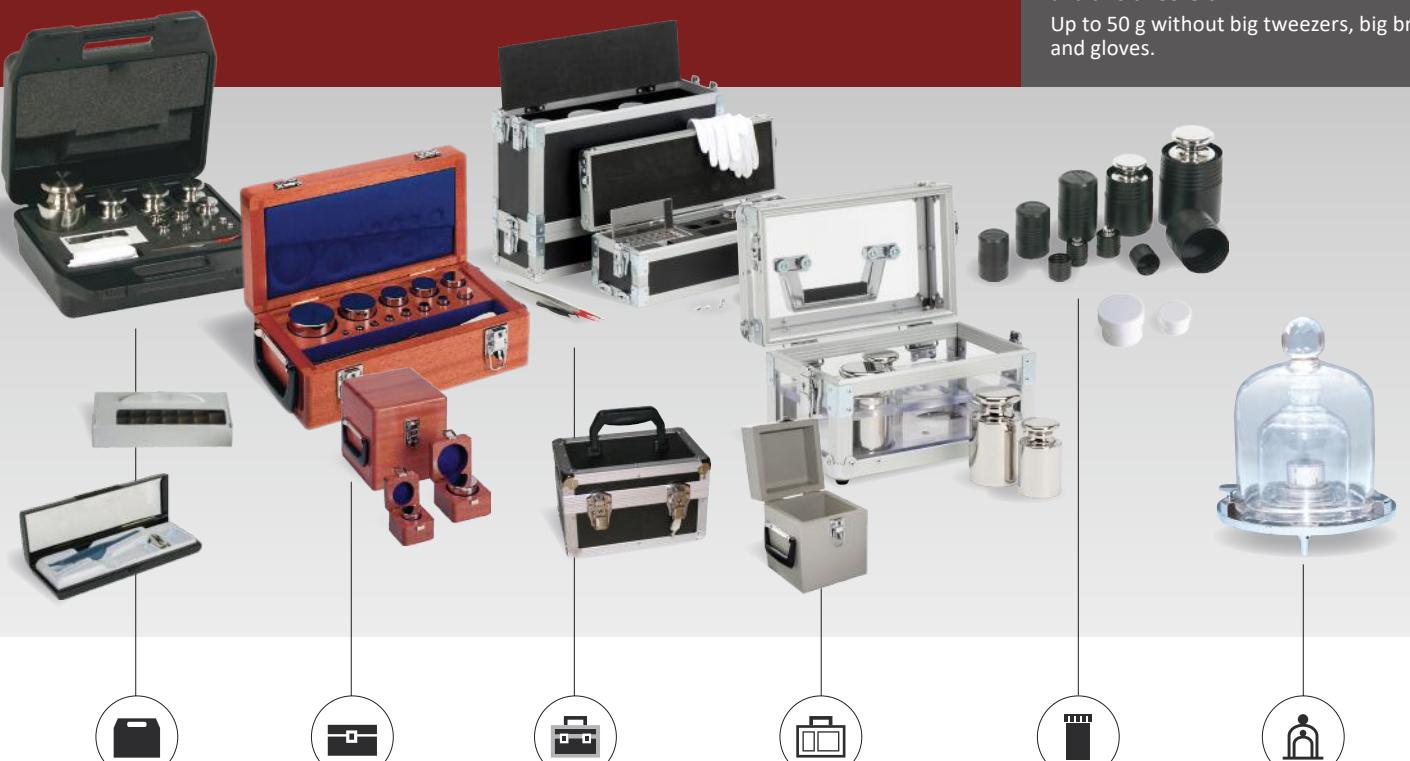

Weights in the exclusive assortment case.

ACCESSORIES

All weight sets include gloves, two brushes and two tweezers.

Up to 50 g without big tweezers, big brush and gloves.

F2

Precision weights - class F2

Adjustment, testing and calibration weights for balances of class II and for quality assurance of scales with steps $\leq 50\,000$ according to ISO 9001ff. Weights for calibration of weights of lower classes (M3-M1) according to OIML R111. Usage for meaningful transactions (e.g. precious metals and gemstones) on scales of class II. Load application bodies for the representation of the most accurate determination of tension, pressure or torsion.

Quality is our demand

ACCESSORIES

All weight sets include gloves, two brushes and two tweezers.
Up to 50 g without big tweezers, big brush and gloves.

Materials to protect the adjustment chamber from external influences for weights of class M1-M3

Disc plugs and underlay plates must always be used together.

Disc plugs

Disc plugs made of tin are our standard, as tin has no magnetic properties and therefore does not influence the measurement results. Less expensive disc plugs made of lead are available upon customer request when magnetic properties are not a major concern.

Lettering and engraving

Foil stamping, engraving and special labels

Style	Description	Using for	Art. no.
Type 1	3 or 5-digit character string, as an impression with engraving stamp	Alphanumeric characters, suitable for lead, brass and stainless steel	2001
Type 2	3- or 5-digit character string, as a CNC engraving	Alphanumeric characters, suitable for grey cast iron, brass and stainless steel	2002
Type 3	Special engravings	Logos and customised letting (e.g. barcodes)	2003
Type 4	Special labels for containers (wooden boxes, synthetic case, service case for weights)	Lettering with customised text, logos and barcodes on silver-coloured labels (Easy label software)	2004

Engravings and impressions on weights. Therefore, they should be carried out before any adjustment or calibration

Special laser inscriptions (special occasion inscriptions that are easy on materials)

Style	Description	Using for	Art. no.
Type 1	1- or 2-digit	Alphanumeric character string for leaf weights 1 mg – 5 mg	2010
Type 2	3- or 5-digit	Alphanumeric character string for all defined weights and units of weight 1 g – 500 kg (stainless steel, brass etc.)	2012
Type 3	Special user characters	Customer-specific content, e.g. serial number, bar codes (line and data matrix) etc.	2013
Type 4	Logos	Customer logos (prepared in jpeg, tiff, gif or pdf formats)	2014

The material structure of the pieces of mass and defined weights is not magnetised. The ability to polish and corn size are maintained to the full extent. Material removal is virtually negligible depending on the font size and the number of characters.

SimplyCal®
BALANCE CALIBRATION

**PERFECTLY
CALIBRATED)**

WHAT IS SimplyCal?

SimplyCal is software for Windows operating computers that assists users in testing and calibrating nonautomatic balances and guides through individually adjustable test methods. SimplyCal differentiates between single-range, multi-range and multi-interval scales. Based on master data SimplyCal analyses entered measurement results and calculates the measurement uncertainty of the balance according to EURAMET/cg-18.

Finally the user generates a calibration certificates or a DAkkS-certificate (in case the calibration laboratory is accredited by Deutsche Akkreditierungsstelle). The calibration validity of test mediums is constantly monitored. The software is optimally suitable for accredited calibration laboratories. SimplyCal can be used as single-user system (computer /notebook) or as multi-user system with a central database (SQL server database).

WHY SimplyCal?

- balance calibration compliant to EURAMET/cg-18
- user-friendly and practice-oriented developed from calibration specialists for calibration specialists
- individualization through adaptable program parameters
- interface to all common ERP systems
- programming, service and technical support through professional software house

Certified to
DIN EN ISO 9001:2015

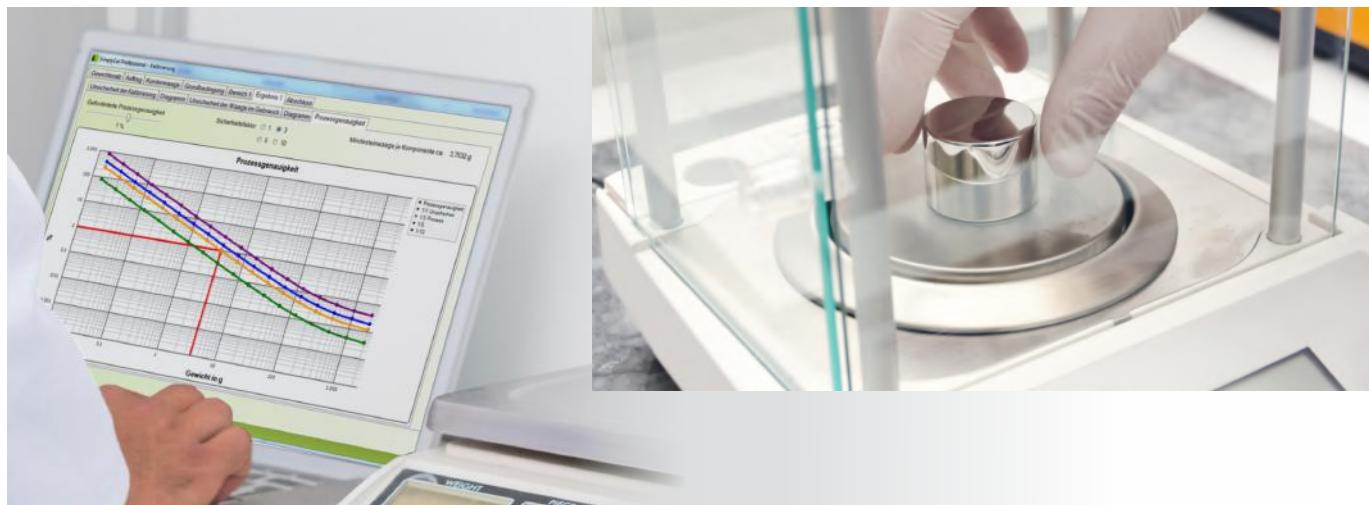

Accredited to
DIN EN ISO/IEC 17025:2018

Deutsche
Akkreditierungsstelle
D-K-15192-01-00

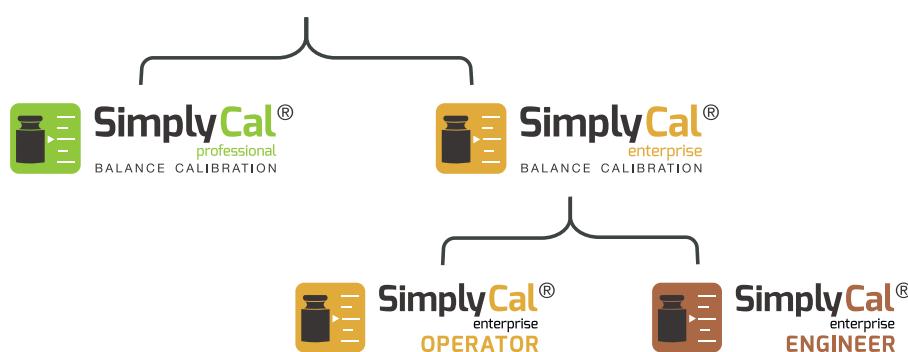

Mitglied im
Deutscher
Kalibrierdienst

HOW DOES SimplyCal WORK?

- management of master data (incl. customers, balance producer, test weights, climate measurement tools and much more)
- six test methods for different types of balances (several minimum and maximum methods)
- testing of repeatability, eccentricity and accuracy
- calculation of minimum sample weight
- calculation of results (statistics and graphs)
- generation of calibration certificate and DAkkS certificate
- monitoring of measuring instruments (test weights and climate measurement instruments)
- quick access functions synchronization of Hafner cali-bration data for test weights

CERTIFICATE

DQS Holding has issued an IQNet recognized certificate that the organization:

Häfner Gewichte GmbH
Hohenhardtswiler Straße 4
DE-74420 Oberrot Germany

has implemented and maintains a
Quality Management System
for the following scope:

Design; manufacturing; adjustment; factory-calibration and sales of weights; mass standards; load bodies and set of weights of all accuracy classes and nominal values including accessories; Production and first sampling of precision parts

which fulfills the requirements of the following standard:

ISO 9001:2015

Issued on: 2022-04-14
Expires on: 2025-04-13

CERTIFICATE

This is to certify that

Häfner Gewichte GmbH

Hohenhardtsweiler Straße 4
74420 Oberrot
Germany

with the organizational units/sites as listed in the annex

has implemented and maintains a **Quality Management System**.

Scope:

Design; manufacturing; adjustment; factory-calibration and sales of weights; mass standards; load bodies and set of weights of all accuracy classes and nominal values including accessories; Production and first sampling of precision parts

Through an audit, documented in a report, it was verified that the management system fulfills the requirements of the following standard:
