## eppendorf

## Natural Winners

You give your all to scientific research every day Eppendorf liquid handling instruments help you grow beyond your limits

# »Global Research, Eppendorf Engineering.«

Perfection down to the smallest detail – this principle is adhered to in the design and functionality of Eppendorf pipettes, dispensers and laboratory consumables. The Eppendorf competence and expertise in liquid handling has resulted in many innovations, award-winning ergonomic designs, cutting edge production and the selection of optimal materials for our products.

## The Eppendorf Liquid Handling Instrument Portfolio

As the first company to launch a microliter pipette, we at Eppendorf have over 60 years' experience in precise manual and automatic pipetting & dispensing to transfer even the smallest quantities of liquids. Today, liquid handling systems from Eppendorf are used wherever accuracy, precision, and absolute reliability are important. In our product development, we strive to simplify cumbersome lab work and make it as safe and efficient as possible so you can concentrate on and accelerate your research.

Master Your Challenging Liquids! Are you working with viscous, volatile, dense or foaming liquids? Become an expert and master even challenging liquids precisely with the right tool.

Eppendorf PhysioCare Concept® The use of our liquid handling products has been proven to reduce physical and psychological strain to a minimum by following the rules of the PhysioCare Concept.

> See page 32 for more information

#### **Eppendorf Services**

A comprehensive range of service programs including maintenance, seminars, application, and technical support as well as certification services build the basis for premium support.

## Which Instrument Should You Use?

Selecting the right pipette or dispenser can be the key to success in your work. It can boost your efficiency and throughput and ensure reliable results for different use cases.

## What are air-cushion and positive displacement instruments?

#### Air-cushion principle

Air-cushion pipettes are most commonly used in labs around the world and ideal for liquids with physical properties similar to water. In this instrument type, the piston is separated from the liquid sample by a small air cushion. Temperature or humidity changes, as well as the physical properties of different liquids can affect the performance of air-cushion instruments. To reduce these risks however, Eppendorf air-cushion pipettes work with extra small air cushions and may be temporarily adjusted to different liquids.

## When should you use an electronic instrument?

The most important general benefits of using an electronic instrument are: better ergonomics by requiring almost no operating forces, a higher precision and reproducibility and an additional efficiency gain due to various operating modes (such as e.g. pipetting and dispensing with only one tool). Furthermore, electronic instruments are the basis for digital lab solutions supporting scientists with choosing settings for different liquid types, collaborating across the lab or documenting steps.

Should you be new to liquid handling, please refer to the information below for a quick introduction to the basics.

## Positive displacement principle In positive displacement systems, the piston is part of the tip and in direct contact with the liquid. There is no air cushion that may be affected by liquid sample properties. These tools are therefore ideal for liquids with varying viscosity, volatility, surface tension or density as well as hot or cold liquids. The disposable tips with integrated pistons also prevent contamination and help to keep user and instrument safe when working with hazardous liquids.

## When should you think about an automated solution?

Automated liquid handling systems such as the epMotion® family are ideal to take over routine and repetitive pipetting tasks that are commonly found in many molecular biological applications. They are ideally suited whenever complex processes need to be standardized, help to reduce the risk of manual pipetting errors, increase reproducibility and free up your valuable time for other tasks.

## Selection Guide

## Air-cushion principle

## Eppendorf Research® plus

The Eppendorf Research plus combines about 60 years of innovation in liquid handling to provide you with one of the safest and most ergonomic pipettes available today. The Research plus pipette is remarkably light, both in terms of weight and pipetting forces, setting new standards for ergonomic operation. It is comforting to know you are working with one of the most advanced pipettes in the world. A spring loaded tip cone, a temporary adjustment option, an improved volume display – and all that in a light, fully autoclavable pipette. In 2021, the Research plus single-channel pipette line-up with variable volume has been certified with an ACT® Environmental Impact Factor Label, making it the ideal choice for labs looking for more sustainable products.

The Research plus pipette will become an indispensable tool in your laboratory.

on

#### **Research plus benefits**

- > Light mechanical pipette designed according to the strict criteria of the Eppendorf PhysioCare Concept<sup>®</sup>
- > Very low weight and operating forces for advanced ergonomics to limit strain on your hand and arm
- > Temporary adjustment option to offset inaccuracies when pipetting warm, cold, volatile or high density liquids and return to factory adjustment without calibration
- > One of the most commonly used pipettes in the world
   > Available as single-, 8-, 12-, 16- and 24-channel as well as adjustable tip spacing multi-channel pipette (Move It<sup>®</sup>)

#### High flexibility

Your new pipette should offer all the flexibility you need. Adjust your Research plus to your needs, autoclave the entire pipette or only the lower part. Choose among single-channel, multi-channel and fixed-volume pipettes in different sizes.

ppendorf Research Plus

#### Temporary adjustment option for various liquid classes

Adjust your pipette in seconds for better accuracy when pipetting various difficult liquids like ethanol or even when pipetting at high altitudes.

> Learn more about Eppendorf 16- & 24-channel pipettes at www.eppendorf.com/ready-set-pipette

\*All single-channel variants with variable volume

#### Advanced ergonomics

Feel the difference in weight, pipetting forces and the spring loaded tip cone\*.

#### Low tip attachment force

Achieve optimal tightness and minimal attachment forces with the Eppendorf Research plus pipette. The spring loaded tip cone\* helps to reduce stress without sacrificing tightness.

#### Low tip ejection force

How many tips do you use per day? Even small differences in the tip ejection force make a big change if you do it day by day. With the Eppendorf Research plus pipette, you'll benefit from one of the lowest tip ejection forces on the market.

**Spring-loaded tip cone\* for exactly reproducible tip fit** No need for rocking. Just a soft pressure is sufficient for tip attachment. Get extremely consistent sample pickup, even in multi-channel pipettes, and maximize user to user reproducibility for more uniform results in your lab.

\* Not available in all variants.

## Eppendorf Reference® 2

The name »Reference« stands for extraordinary precision and accuracy, a long service life, and an ergonomic design. With an innovative one-button operation, the Reference 2 allows fast and ergonomic handling with reduced operating efforts. Its unique smooth surface and autoclavability guarantee efficient decontamination making it the ideal companion when working under sterile conditions.

Our best material and the latest technologies are implemented in this pipette, making it a reliable partner for you and your demanding work.

#### **Reference 2 benefits**

- > High precision and accuracy provides reliable results
- > 4-digit display for highly accurate volume setting (clearly visible from every angle)
- > Quick and secure volume setting, including volume lock
- > Fully autoclavable and easy-to-clean smooth surface
- > Color coded and volume labeling for quick identification of the volume size/tip size
- > Round upper part makes it possible to work in every position
- > Available as a single-channel pipette in fixed or variable volume as well as 8- and 12-channel pipette

#### User friendly temporary adjustment

For liquids other than aqueous solutions, pipettes have to be adjusted. The Reference 2 provides easy possibility to do so, leaving the factory settings untouched. Reset back to manufacturer setting just as quick and easy.

DESIGN

> Learn more and find product videos at www.eppendorf.com/reference2

#### Stainless steel upper part

The external edges made from stainless steel equip the Reference 2 with outstanding robustness at potential impact sites. It includes a quick volume setting and secure volume lock.

#### Spring-loaded tip cone

Attach every tip with the same force – regardless of the user. Achieve optimal tightness with low attachment and ejection forces.

#### Unique surface

Few grip marks and a smooth surface for comfortable working and simple cleaning. The Reference 2 is fully autoclavable without disassembling.

#### Sturdy upper handle

Guarantees long service life and increased robustness.

#### Heightened traceability

The serial number is printed on multiple components of the pipette. This prevents parts from being mixed up and indicates if one of the volume defining parts has been exchanged.

## Eppendorf Xplorer<sup>®</sup>/Eppendorf Xplorer<sup>®</sup> plus

People who give 100% every day deserve the best tools and the best equipment. You work on demanding problems, and important decisions depend on the results of your work. With the Eppendorf Xplorer or Xplorer plus electronic pipette, your work achieves a new level of simplicity, precision and reproducibility, which means no more delays due to complicated programming or inflexible processes.

All Eppendorf Xplorer and Xplorer plus single-channel pipettes are certified with an ACT® Environmental Impact Factor Label, providing laboratories with a standardized way to assess sustainability standards and choose environmentally-friendly suppliers.

#### Xplorer/Xplorer plus benefits

- > Intuitive handling: Selection dial & multifunctional rocker
- > Optimal ergonomics: Designed according to Eppendorf PhysioCare Concept
- > High reproducibility: Spring loaded tip cone, individual adjustment, and a motorized piston
- > Ease of use: After tip ejection, the piston automatically returns to the zero position
- > Includes a history function that automatically saves the last parameters for faster handling
- > Full control: Edit and Help at the push of a button > Available as single-, 8-, 12-, 16-, and 24-channel as well as adjustable tip spacing multi-channel pipette (Move It®)

Pipette Manager Connect electronic pipettes and start pipetting right away. See more on page 28.

#### Expanded version

The Eppendorf Xplorer plus electronic pipette is the perfect choice for all users who simply need a little extra - more safety and speed every day! With its additional intelligent modes, adjustable fixed volumes and individual settings, tasks are performed much faster and easier. A password can be entered to guarantee the highest degree of protection for your programming and settings.

To ensure adherence to service intervals and thus guarantee the accuracy of your results, the Xplorer plus pipette offers an integrated service reminder. You can choose a reminder based on the period of time or on the frequency of use.

# Eppendorf Research® plus Move It® and Eppendorf Xplorer® plus Move It®

## Double your performance

Often, single-channel pipettes are used for multiple sample transfer from one vessel type to another, from tubes to plates for instance. This can be time-consuming and inconvenient, especially when throughput increases. Instead of pipetting many times, up to twelve samples can now be moved simultaneously with the 4-, 6-, 8- and 12-channel Move It pipettes. Move It pipettes are equipped with adjustable cones for variable tip spacings according to your vessel format. This easy handling of format changes helps to reduce throughput time by 50 % and increase reproducibility of your results. Format limiter Enabling quick switches backwards and forwards between the formats

#### Move It benefits

- > Easy and fast format changes increasing your efficiency up to 50 %
- > Less breaks needed thanks to an optimal balance in the hand
- $> 360^\circ$  rotatable pipette head for fast identification of parameters
- > Tubeless design allows for increased durability, precision and autoclavibility

20

#### Rotating lower part – 360°

> Comfortable readability of display

> Ergonomic and relaxed body posture

#### Adjustment knob

- > Quick manual tip spacing adjustment
- > Spacing adjustment without vibrations

#### Adjustable tip spacing

- > For microplates, sample tubes, agarose gels and further formats
- > Tip spacing freely selectable
- between 4.5 and 33 mm

#### **Tubeless system**

- > Reliable robustness and precision
- > Easy autoclavability\*

#### Format change

> Easy and fast among plates with up to 384 wells, 1.5 and 2.0 mL tubes and agarose gels

\* Xplorer plus lower part only, Research plus fully autoclavable

> Find more information at www.eppendorf.com/move-it

## epT.I.P.S.®

The fact that a tip fits onto a pipette cone does not say anything about the performance of the pipetting system comprising the components »Pipette and Tip«. The standard ISO 8655 considers pipettes and pipette tips as a system. Eppendorf as a system provider manufactures a system instead of single parts of it.

epT.I.P.S. piptte tips are available in purity grades of Eppendorf Quality, PCR clean and Biopur<sup>®</sup>. Packed as reloads, reusable boxes, racks for single-use and singles blistered in medical paper.

## epT.I.P.S.® 384

epT.I.P.S. 384 pipette tips are optimized for Eppendorf 16- and 24-channel pipettes and selected Move It variants. Process 384-well plates manually with highest level of tip tightness and coaxiality but extraordinary low operating forces.

epT.I.P.S. 384 are available in purity grades of Eppendorf Quality and PCR clean, packed as reusable box and reloads.

Also available: ep Dualfilter T.I.P.S. 384 with the renowned Eppendorf dualfilter technology.

## ep Dualfilter T.I.P.S.®

Premium filter tips with a two-phase filter for contamination protection. The two filter layers, made of flexible, hydrophobic material, fit perfectly in the tip cone and retain nearly 100 % of all aerosols and biomolecules.

ep Dualfilter T.I.P.S. are available in PCR clean/Sterile and Forensic DNA Grade. Also available as ep Dualfilter T.I.P.S. SealMax for reliable protection from accidental over-pipetting.

## Twice as Fast in 384-Well Applications

With the advent of the high-throughput screening approach, wells arose. The 384-well microplate was then developed which is widely used in the pharmaceutical research and implemented as a consumable for drug development industry the need for microplates with a larger number of assays.

## 16 / 24-Channel Pipettes and epT.I.P.S.® 384

With the lightweight Research plus pipette or the fast and precise Xplorer plus electronic pipette you get a higher volume of precision work done. Get extremely consistent sample pickup across all channels and fill a complete 384-well plate within 1 minute. It couldn't be easier to perfectly hit all 384 wells as the epT.I.P.S. 384 have an extremely fine tip shape, and an extraordinary coaxiality which enables a perfect tip alignment.

## 384-Well Plates

Eppendorf consumables make everyday routines faster, easier, and more reliable. Eppendorf 384-well plates are available as Deepwell plates (384/200 µL), Microplates (384/F and 384/V), Assay/Reader Microplates (384/V black and white), Protein and DNA LoBind and twin.tec® PCR plates.

## Multipette® M4

The Multipette M4 multi-dispenser is the ideal precision instrument for completing long pipetting series without the need for repeated liquid aspiration.

The Multipette dispenser is the tool of choice when working with liquids that possess demanding physical properties like high viscosity, density or volatility. With the Multipette/Combitips® system, volumes are dispensed using the positive displacement principle. The liquid is directly dispensed without an air-cushion, ensuring highest precision regardless of the physical properties of the liquid.

#### **Multipette M4 benefits**

- > Automatic Combitips<sup>®</sup> advanced dispenser tips recognition eliminates time-consuming volume calculations
- > Dispensing up to 100 times without refilling the Combitips<sup>®</sup> tip
- > Wide dispensing range: 1  $\mu$ L to 10 mL
- > Stress-free work via integrated step counter: Dispensing procedures can be continued error-free after an interruption or distraction
- > Fully emptied Combitips<sup>®</sup> can be easily ejected with one hand using the operating lever

## Multipette<sup>®</sup> E3 / Multipette<sup>®</sup> E3x

The Multipette E3 and E3x make your everyday pipetting routines faster, easier and more precise. They combine the advantages of a positive displacement dispenser, time saving and precise handling of challenging liquids, with those of an electronic pipette. Even tough-to-handle liquids like cream can be dispensed in combination with the ViscoTip<sup>®</sup> dispenser tips.

#### The Multipette E3 and E3x offer the same benefits as the M4.

#### Additional benefits of the Multipette E3 and E3x

- > Defined aspiration and dispensing speed for highest reproducibility of results (eight different speed levels)
- > Easy to read: Enlarged color display, optimized contrast, clear arrangement of all parameters
- > Store up to 225 different parameter settings to save programming time for routine applications
- > All selected parameters shown at one glance
- > Display/operating menu in 9 different languages

Precision for challenging liquidsTime savingThe Multipette M4 dispenserThe Multipettcan precisely dispense evenhelps to makeviscous, volatile, foaming andseries easier,high-density liquids.helps to make

Time saving The Multipette M4 dispenser helps to make long dispensing series easier, safer, and faster.

> Pipette even challenging liquids like an expert: www.eppendorf.com/m4

# Feature High speed aspiration and dispensing with motorized piston Automatic Combitips® advanced tip recognition One button tip ejection Volume range from 1 μL to 50 mL Rechargeable lithium-ion battery Illuminated display Automatic dispensing Pipetting Dispensing Aspirate (aspiration of supernatants) Titrate Sequential dispensing Combined aspiration and dispensing mode

> Multipette E3 and Multipette E3x are the experts for long series pipetting and liquids with demanding physical properties: www.eppendorf.com/multipette-system

## Combitips<sup>®</sup> advanced

In combination with the Multipette M4 and E3/E3x, Combitips advanced dispenser tips form an ideal system for a broad range of liquid handling applications.

#### **Combitips advanced benefits**

- > Time saving for long dispensing/pipetting series
- > High-precision dispensing regardless of the physical properties of the liquid (e.g., viscosity, volatility, density, temperature...)
- > Prevention of aerosol contamination with hermetically sealed piston
- > Protection from radioactive and toxic substances
- > 9 available volume sizes (0.1 mL–50 mL) offer a maximum range of dispensing volumes
- > Individually color coded: Quick identification of the desired Combitips dispenser tips speeds up your workflow (color coding is also visible on packaging)

## ViscoTip<sup>®</sup>

Let it flow! The Multipette consumable ViscoTip is specialized on tough-to-handle liquids like cream. Therefore, ViscoTip dispenser tips naturally expands the broad range of applications for our often copied, never equaled Combitips advanced/Multipette system. For fast, precise and safe liquid handling.

#### ViscoTip benefits

- > Specialized for liquids with a dynamic viscosity from 200 mPa\*s to 14.000 mPa\*s
- > For dispensing volumes from 100  $\mu$ L to 10 mL in increments of 10 µL
- > Significantly lower operation force, thus speeding up work and reducing energy consumption
- > Automatic tip recognition and volume calculation
- > Free of experiment-interfering leachables and slip agents

#### Variety and selection

With 9 volume sizes (0.1 mL to 50 mL) and 4 purity grades (Eppendorf Quality<sup>™</sup>, PCR clean, Eppendorf Biopur®, and Forensic DNA grade) you will always find the perfect Combitips dispenser tip for your application!

Elongated tips (for 2.5 mL, 5 mL, 10 mL) Complete emptying of all common tubes prevents sample loss

#### Dynamic viscosity

The ViscoTip dispenser tips is specifically designed and optimized for handling high viscosity liquids up to 14,000 mPa\*s such as Glycerol 99.5%, Tween, oils, cremes, shampoos or honey. It sharply reduces operating forces while handling such liquids leading to enhanced ergonomics, increased working speed and longer charge life time of your Multipette dispenser battery.

> Find more information at www.eppendorf.com/multipette-viscotip

## Easypet® 3

It has never been easier to combine speed, safety, precision and comfort. Experience a new dimension of speed control and precision by intuitive, convenient speed adjustment. You will always be informed about your battery status with the vibrantly backlit LED battery meter.

## Pipet Helper®

The Pipet Helper is a pipet controller which covers the range of bulb and graduated pipettes from 0.1 to 200 mL. The valve system allows for convenient operation without effort. Low weight and optimized design with ergonomic arrangement of functions.

#### **Eppendorf Serological Pipets**

The serological pipets are made of ultra-clear virgin polystyrene. They have a sterility assurance level of 10<sup>-6</sup> and a certified absence of detectable pyrogens, DNA, RNase and DNase, non-cytotoxic.

## Varipette<sup>®</sup> 4720

The Varipette is a continuously adjustable pipette that works according to the air-cushion and positive displacement principle. Thus the pipette is especially designed for precise pipetting of liquids with high vapor pressure or viscosity. The Varitip<sup>®</sup> P and S pipette tip systems are tailored to different vessels.

## Varispenser<sup>®</sup> 2/2x

Varispenser 2/2x bottle-top dispensers are ideal for dispensing aliquots of liquid from supply bottles. Available in 6 sizes for 0.2-100 mL and fully autoclavable. Varispenser 2x has a recirculation valve which prevents reagent loss while ventilating.

## **Eppendorf** Top Buret

The Eppendorf Top Buret bottle-top burette sets standards for manual titration. Its pulse-free dispensing technique allows continuous dispensing of liquid with precision values within required limits.

> Watch our video on bottle-top dispensing on YouTube

## The Future is Now! Connect your Electronic Pipettes

Who doesn't enjoy greater freedom and convenience when it comes to pipetting? Be ahead of the curve! Upgrade to connected electronic pipettes and enjoy faster operation, increased reproducibility and digital documentation of every step.

- > Work faster by selecting your volume and pipetting speed via touch screen
- > Be more accurate with guidance for pre-defined liquid classes
- > Be confident about your documentation with digital records of your pipette activities

#### Evolve your electronic pipette with the Eppendorf Pipette Manager

Easily convert your Eppendorf Xplorer, Xplorer plus or Move It electronic pipettes into connected devices with a WiFi module.

Connect to the Pipette Manager and take your pipetting to the next level. The standalone touch server allows for even more ease of use and quicker setting of features while giving ad hoc guidance for ideal settings when working with challenging liquids. If needed, it can even document every pipetting step.

How does the Pipette Manager system work?

1. Convert Eppendorf Xplorer, Xplorer plus and Xplorer plus Move It pipettes into connected electronic pipettes.

- 2. Pipette Manager External touch server establishes communication with connected electronic pipettes and tablets via WiFi technology.
- 3. Connect your tablet (Android and iOS) to work in parallel with other lab users.

## Eppendorf Pipette Holder System

Carousels, stands and wall mount devices: The Pipette Holder System is perfect for all users of handheld liquid handling instruments, who need a highly flexible system for their Eppendorf pipettes and Multipette multi-dispensers.

To save precious bench-top space, carousels carry both mechanical and electronic instruments.

Rotatable carousel holder in two variants to hold or hold & charge up to six instruments. High flexibility due to exchangeable adapters

Pipette stands as holder or including a charging function for single devices. High flexibility due to exchangeable adapter

> Learn more and experience a digital demonstration at: www.eppendorf.com/pipette-manager

Various holders for wall-mounting, installation on a shelf above the bench or inside biological safety cabinets

> Find all models and variants at: www.eppendorf.com/pipetteholder

## Eppendorf epMotion® Portfolio

## epMotion<sup>®</sup> 96

The Eppendorf epMotion 96 is a semi-automated, 96well multichannel pipette for fast and precise parallel microplate processing. It is an easy to use bench top liquid handling system for high precision pipetting in 96 and 384 well plates. Without changes to the system, a large volume range of 0.5  $\mu$ L to 300  $\mu$ L is available for convenient use over a range of applications. Its ergonomic design and intuitive handling makes the ep-Motion 96 a great tool for anyone in the lab who needs fast and precise liquid handling in 96 format.

## Product Feature Highlights epMotion 96/96xl

- > Electronic pipetting with parallel piston movement for better precision and reproducibility
- > Two tip sizes covering the 0.5 µL to 1,000 µL operational range for maximum accuracy
- > Auto-detection of tip sizes without the need to change heads
- > Use 96 tips at once or use tips column-wise (8, 16, 24, etc.)

## epMotion® 5070

Our smallest member of the epMotion family is the most compact solution for accurate and reproducible automated pipetting. This makes the epMotion 5070 a perfect match for any routine application such as PCR and qPCR setup, serial dilutions, reagent distribution, sample transfer from tubes to plates, and sample normalization.

## Product Feature Highlights epMotion 5070

- > 4-position worktable
- > Volume range 0.2 to 1,000  $\mu L$  (depending on used dispensing tools)
- > Automatic tool exchange for 2 tools
- > Small footprint of 65  $\times$  48 cm fits small lab benches
- > MultiCon PC controller with simulation, network and software upgrade options
- > Intuitive drag-and-drop-based software

Available as PCR Solution bundle with dispensing tool and accessories.

## epMotion<sup>®</sup> 5073

These automated pipetting systems are perfectly suited for PCR and qPCR setup, nucleic acid purification as well as low-throughput NGS library preparation. It yet retains the flexibility that allows the use as open platforms for diverse liquid handling tasks. The epMotion 5073 series automates and simplifies what are traditionally complex, labor-intensive pipetting tasks, saving time and improving the reproducibility of results.

## Product Feature Highlights epMotion 5073

- > 6-position worktable
- > Volume range 0.2 to 1,000 µL (depending on used dispensing tools)
- > Automatic tool exchange for 3 tools
- > Option for gripper, one thermal module\*1 or Eppendorf ThermoMixer®\*2
- > Optional UV lamp and air filter system for decontamination and clean air condition
- > MultiCon PC controller with simulation, network and software upgrade options
- > Intuitive drag-and-drop-based software

Available as NGS Solution bundle with specific software license, dispensing tools, accessories and consumables.

## epMotion<sup>®</sup> 5075

The epMotion 5075 is the ideal solution for various liquid handling demands. It offers the same outstanding accuracy and precision as epMotion 5070 & 5073. The available options make the 5075 an excellent and most flexible device for applications such as NGS library preparation, PCR and qPCR setup, magneticbead-based and filter-based purification, cell-based assays or any routine pipetting tasks.

#### Product Feature Highlights epMotion 5075

- > Up to 15 worktable positions
- > Volume range 0.2 to 1,000  $\mu L$  (depending on used dispensing tools)
- > Automatic tool exchange for 4 tools
- > Option for gripper, 1-3 thermal modules, Eppendorf ThermoMixer® and vacuum station
- > Optional UV lamp and air filter system for decontamination and clean air condition
- > MultiCon PC controller with simulation, network and software upgrade options
- > Intuitive drag-and-drop-based software

Available as NGS Solution bundle with specific software license, dispensing tools, accessories and consumables.

## The Eppendorf PhysioCare Concept®

The mission of Eppendorf has always been to improve the living conditions of our customers. Nowadays, where people spend a lot of their time at work, the ergonomics of their tools and the whole work environment is becoming more important for your well-being. Thus the development of each Eppendorf pipette is based on three spheres that support the health of our customers.

Each of these spheres offers stringent ergonomic criteria which are directly involved in the users work process:

#### The User:

The PhysioCare Concept guarantees an ergonomic design and an optimized product performance according to the needs of the individual.

#### The Lab:

The PhysioCare Concept allows the uncomplicated integration of instruments in the lab as well as adhering to its specific requirements. The Laboratory Workflow:

The PhysioCare Concept ensures general support to enhance processes around the lab and improve the results of the whole organization.

PhysioCare

## epServices

## Supporting You – Eppendorf Services

Installation Service

Qualification Preventive Service

Calibration / Maintenance Verification

At Eppendorf, we are committed to providing reliable services to help you maintain premium performance, and maximum safety of your Eppendorf instruments. Our carefully designed service solutions are performed by our dedicated Application, Training and Technical Service teams worldwide.

#### **Pipette Calibration Services**

Maintaining and verifying your semi-automated pipette Pipettes are precision instruments, and require regular maintenance and checks to stay in peak performance. accuracy and precision is highly recommended to make Therefore, regular maintenance, calibration, and adjustsure your system still dispenses according to the manufacturer specifications. In the end you will receive assured ment services by Eppendorf will help identify potential issues, and assure your pipettes and dispensers continue results with your downstream applications and your to generate reproducible results. Our globally available valuable samples and reagents. pipette service portfolio follows strict international quality standards for calibration.

#### Liquid Handling Training and Webinars

The user experience is also very important for achieving good pipetting results. In our most popular training you will learn about the principles of pipetting ergonomics, correct pipetting techniques, routine maintenance and pipette calibration.

Application Support

Training / Webinar

Especially the precision and accuracy of pipettes and dispensing tools of semi-/automated liquid handling devices are important for the quality and reproducibility of your work results. With our service portfolio we offer you a range of quality maintenance and qualification services for different user requirements.

## epMotion<sup>®</sup> 96 Services

## epMotion<sup>®</sup> Services

With our global epMotion<sup>®</sup> Service Agreements from cost-efficient to all-inclusive care packages and our Application Implementation Services we take the load off your shoulders by assuring consistent performance, continuous productivity and a long service life.

## Varipette<sup>®</sup> 4720

Description	Order no.
Varipette <sup>®</sup> 4720, with continuous volume selection in the 1–10 mL range	4720 000 011
Varitips® P, to remove liquid from smaller vessels, 100 pieces	0030 048 130
Varitips® S Starter Kit, consisting of 100 Maxitips, 10 dispensing parts, 10 valves	0030 050 525
Varitips® S dispensing part, 30 pieces	0030 050 533
Varitips <sup>®</sup> S, graduated, 200 pieces	0030 050 568
Varitips <sup>®</sup> S valve, 100 pieces	0030 050 541

## Eppendorf Pipette Holder System

Description	Order No.
Pipette Carousel 2, for 6 Eppendorf Research <sup>®</sup> , Eppendorf Research <sup>®</sup> plus, Eppendorf Reference <sup>®</sup> , Eppendorf Reference <sup>®</sup> 2 or Biomaster <sup>®</sup> , additional pipette holders are optionally available	3116 000 015
Charger Carousel 2, for 6 Eppendorf Xplorer <sup>®</sup> or Eppendorf Xplorer <sup>®</sup> plus, mains/power adapter included, additional charger shells and pipette holders are optionally available	3116 000 023
<b>Charger Stand 2,</b> for one Eppendorf Xplorer <sup>®</sup> or Eppendorf Xplorer <sup>®</sup> plus, operated with mains/power adapter supplied with Eppendorf Xplorer <sup>®</sup> or Eppendorf Xplorer <sup>®</sup> plus	3116 000 031
Charger Stand 2, for one Multipette <sup>®</sup> E3/E3x or Multipette <sup>®</sup> stream/Xstream, operated with mains/power adapter supplied with Multipette <sup>®</sup> E3/E3x or Multipette <sup>®</sup> stream/Xstream	3116 000 040
Pipette Stand 2, for one Multipette <sup>®</sup> M4, without charging functionality, additional pipette holders are optionally available	3116 000 058
<b>Pipette Holder 2,</b> for one Eppendorf Research <sup>®</sup> , Eppendorf Research <sup>®</sup> plus, Eppendorf Reference <sup>®</sup> , Eppendorf Reference <sup>®</sup> 2 or Biomaster <sup>®</sup> , for Pipette Carousel 2 and Charger Carousel 2 or wall mounting, sticky tape included	3116 000 112
<b>Pipette Holder 2,</b> for one Eppendorf Xplorer <sup>®</sup> or Eppendorf Xplorer <sup>®</sup> plus, for Pipette Carousel 2 or wall mounting, sticky tape included, without charging functionality	3116 000 120
<b>Pipette Holder 2,</b> for one Multipette <sup>®</sup> E3/E3x or Multipette <sup>®</sup> stream/Xstream, for Pipette Carousel 2 or wall mounting, sticky tape included, without charging functionality	3116 000 139
<b>Pipette Holder 2,</b> for one Multipette <sup>®</sup> M4, for Pipette Carousel 2 and Charger Carousel 2 or wall mounting, sticky tape included, without charging functionality	3116 000 147
Charger Shell 2, for one Eppendorf Xplorer <sup>®</sup> or Eppendorf Xplorer <sup>®</sup> plus, for Charger Carousel 2, with charging functionality	3116 602 007
Charger Shell 2, for one Multipette® E3/E3x or Multipette® stream/Xstream, for Charger Carousel 2, with charging functionality	3116 603 003

## Multipette® M4

#### Description

Multipette® M4, incl. 1x Combitips® advanced 2.5 mL tip and holder for wall mounting or pipette carousel, 1 μL – 10 mL

Multipette® M4 Starter Kit, incl. Combitips® advanced Rack, Combitips® advanced assortment pack (1 tip of each size) and holder, 1  $\mu$ L – 10 mL

## Multipette® E3/E3x

#### Description

Multipette® E3, incl. charging cable and Combitips® advanced assortment p Multipette® E3 bundle with charger stand, incl. charging cable, Charger St assortment pack, 1 µL – 50 mL

Multipette® E3x, incl. charging cable and Combitips® advanced assortment Multipette® E3x bundle with charger stand, incl. charging cable, Charger Stand 2 and Combitips® advanced assortment pack, 1 µL - 50 mL

#### Dispensing tools

Highly precise pipetting heads, for use in the tool holder of the epMotion® workstation. Each dispensi	ing tool is completely autoclavable at 121 °C,
1 bar for 20 min. A quality certificate for the measurement results accompanies each tool.	
TS 10, single-channel dispensing tool for the volume range 0.2–10 $\mu$ L	5280 000 100
TS 50, single-channel dispensing tool for the volume range 1–50 $\mu$ L	5280 000 010
TS 300, single-channel dispensing tool for the volume range 20–300 $\mu L$	5280 000 037
TS 1000, single-channel dispensing tool for the volume range 40–1,000 $\mu L$	5280 000 053
TM 10-8, 8-channel dispensing tool for the volume range 0.2–10 $\mu L$	5280 000 304
TM 50-8, 8-channel dispensing tool for the volume range 1–50 $\mu$ L	5280 000 215
TM 300-8, 8-channel dispensing tool for the volume range 20–300 $\mu L$	5280 000 231
TM 1000-8, 8-channel dispensing tool for the volume range 40–1,000 $\mu L$	5280 000 258
Holder for 6 dispensing tools	5075 774 003

## The Science of Pipetting to Perfection

Do you already know everything there is to know about pipetting? We have created a comprehensive guidebook to help you carry out good science.

Discover what you should consider before selecting a new pipette and how correct usage and careful maintenance will ensure your instrument always functions at peak performance.

With this eBook, you'll learn...

- > How to maintain and increase reproducibility & reliability of results
- > Tips to streamline workflows and increase efficiency
- > Insights on how to perform your work in a safe manner
- > Info on how to create ergonomic health-promoting working conditions
- > Best practices for optimal pipette performance

> Download your copy today: www.eppendorf.com/pipetting-eBook
